

AI

User manual

Hello, dear colleagues!

Thanks for buying this template. Here is a step-by-step manual to use this project. It's very simple in use:

1. Open **"AI.aep"** file in after effects and import your logo, video, images inside project assets window
2. **Open the tab " Logo "** tab on timeline and put your logo, video or text inside it. You can use any text instead with any font you like. For best result use guide lines to fit your logo inside it.
3. **Text** - Here, double-click to edit your text.

4. In the project I used music and font, you can find it here.
